

THINK ENERGY!

Environmental Disclosure Label Commonwealth Edison

Think Energy, LLC (“Think Energy”) is required to report fuel sources and emissions data on a quarterly basis under Section 16-127 of the Electric Service and Customer Choice and Rate Relief of 1997 and the regulations of the Illinois Commerce Commission, 83 Ill. Admin. Code 421. This report reflects that 100% of the total electricity supplied was through the PJM System Mix; the amount of nuclear waste attributable to producing electricity is not known and is not included in the table below. All other emissions are calculated using the PJM System Mix.

This report does not necessarily reflect the actual characteristics of energy that Think Energy will supply, **nor does it reflect how Think Energy offsets 100% of your electricity usage with renewable energy certificates (if you selected a *Think Clean* plan; refer to your Terms of Service)**. Finally, this report does not reflect that each time a customer enrolls with Think Energy, we commit to protecting 50 trees in the rainforest – enough to offset 1.1 metric tons of carbon dioxide emissions and contribute to a more sustainable world.

For more information about this report, or to talk to a member of Think Energy about your plan, email us at Care@ThinkEnergy.com or call us at 888-923-3633.

EXHIBIT A – Sources of Electricity Table	
Sources of Electricity Supplied for the 12 Months Ending on March 31, 2024	
Coal-fired Power	14.84%
Hydro Power	1.00%
Natural Gas	44.28%
Nuclear Power	33.40%
Solar Power	1.48%
Wind Power	3.52%
Other Resources	1.48%
SUM OF RESOURCES	100%

EXHIBIT C – Emissions and Nuclear Waste Table	
Average Amounts of Emissions and Amount of Nuclear Waste per 1000 kilowatts (kWh) Produced from Known Sources for the 12 months Ending on March 31, 2024	
Carbon Dioxide (lbs.)	735.13
Nitrogen Oxides (lbs.)	0.25
Sulfur Dioxide (lbs.)	0.32
High-Level Nuclear Waste (lbs.)	Unknown
Low-Level Nuclear Waste (lbs.)	Unknown
